

Workshop1: Research Integrity for New Generation of Researchers

Chair:

Snežana Krstić, Eurodoc

krstic2003@yahoo.com

Rapporteur:

Leone Cavicchia, Eurodoc

Speakers:

Diana Malpede, UNESCO (to be confirmed)
Randell Stephenson, Committee of Publication Ethics-COPE
Ana Marušić, Council of Science Editors (to be confirmed)

Kamaruzaman Jusoff, University Putra Malaysia and
visiting Professor/scientist at Yale, Kyoto and
Harvard universities (to be confirmed)

Research Integrity (RI) is a subject which gains increasing significance in researchers' world by promoting responsible research, professional standards, and, at the same time, indicating problems and traps related to various sorts of research misconduct (including plagiarism, fabrication, falsification and similar). Younger generations of researchers are particularly vulnerable, as often they do not have possibility to get proper training or instructions, they are exposed to high publishing demands, and frequently face problems due to irresponsible conduct of senior colleagues. Recent European and international activities in the field of research integrity offer new insights and prospects relevant for junior researchers as well. The aim of the workshop is: 1) to provide broader understanding of the issue and main concerns related to RI; 2) to introduce to the relevant European and international activities and initiatives 3) to emphasize and discuss problems specific for junior researchers 4) to provide more active role for early-stage researchers in shaping of integrity culture.
