TRAINING TALENTED RESEARCHERS FOR THE KNOWLEDGE SOCIETY

Tradition and innovation in doctoral training

Katrien Maes, LERU

1 April 2011, Vilnius
EURODOC conference

Tradition and innovation in doctoral training

**From
apprentice
to
trainee**

**From a
ticket to an
academic
career to a
ticket to the
world**

Factors influencing these changes

**Societal
demand**

**The nature
of the
research
enterprise**

The interplay of research activity and personal/professional development

Competence

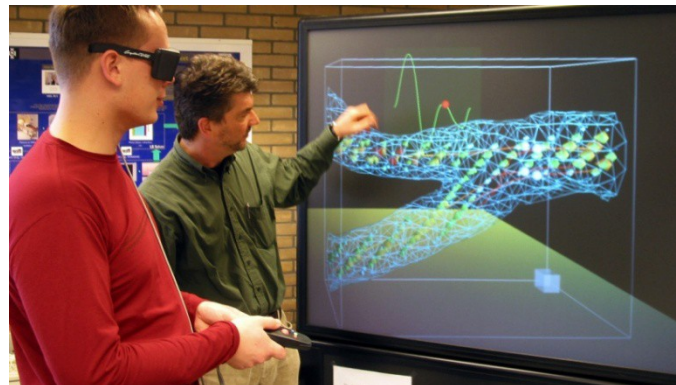

Achievement

Social skills

Principles of the modern doctorate

Doctoral researchers are the **drivers** of their professional development,
while being immersed in a **research-rich** environment,
where boundaries to other research fields are highly **permeable**,
and in which connections to the external world have a **global outlook**,
and link to other sectors of **society**,
so that the **skills** the new doctors develop are highly valuable to the knowledge society.

A concerted effort by all concerned

Doctoral candidates
Universities
Employers
Governments

Thank you for your attention!
